FOREWORD

This annual report represents final catch data for 1987.

Monthly periods do not coincide exactly with calendar months, but are held constant at either four or five weekly periods as follows:

Four weeks - February, March, May, June, August, September, November and December.
Five weeks - January, April, July and October.

Landings by Canadians at B.C. and U.S. ports are reported in this publication.

This report was compiled automatically from sales slip and summary information collected and maintained by the Statistics Division in conjunction with the Information Technology & Systems Division.

IMPORTANT NOTES

1. Salmon is reported in this publication as follows:

   - Troll and Handline are reported dressed weight head-on, unless otherwise specified.

   - Seine and Gill Net are reported round weight.

2. Taku and Stikine catches are now excluded from the North Coast Summary.

3. "Small" Chinook are net caught fish under 5 pounds round weight.

4. Due to rounding, rows and columns may not total exactly.

5. In this publication, 'dates' refers to the date of delivery. The date of delivery is not necessarily the date of catch for troll freezer boats or for gill-netters and seiners using modern fish storage methods.

6. The conversion factor for metric ton is:

   1 Tonne = 2,204.6 pounds

7. Round weight is the weight of the whole fish as it comes from the water before any treatment or dressing.
