F O R E W O R D

This annual summary of British Columbia Catch Statistics introduces the metric system to the Pacific Fisheries. While it still follows the general format originally used in 1969, the figures are now shown in metric tons (1000 kilograms). The summary will be followed by a detailed Annual Report to be made available on written request.

Preliminary monthly printouts are prepared throughout the year which summarize landings and values by species. This annual summary includes revisions of these data and represents final statistics for 1978.

Prior to 1973 net caught salmon was valued at the cash buying price or minimum prices negotiated by the United Fishermen and Allied Workers Union and the Fisheries Association of British Columbia. Since 1973 actual prices paid on the fishing grounds have been used because competition for salmon has resulted in higher than minimum negotiated prices being paid.

Weights shown may be dressed or round, and are indicated on table headings. Halibut landings include fish delivered by Canadian fishermen to U.S. ports.

Monthly periods do not coincide with calendar months, but are held constant as four or five weekly periods for historical comparison. Four week periods are March, May, June, August, September and November; five weeks are April, July and October.

This report was compiled by the staff of the Statistics Services Unit under the direction of Mrs. M. Walker from summaries developed by the Data Processing Unit.

N O T E S

With modern methods of icing and brining used by gill-netters and seiners and the increase in the number of troll freezer boats "dates" in this publication refer to date of delivery, and not necessarily date of catch.

The conversion factor for metric tons is:

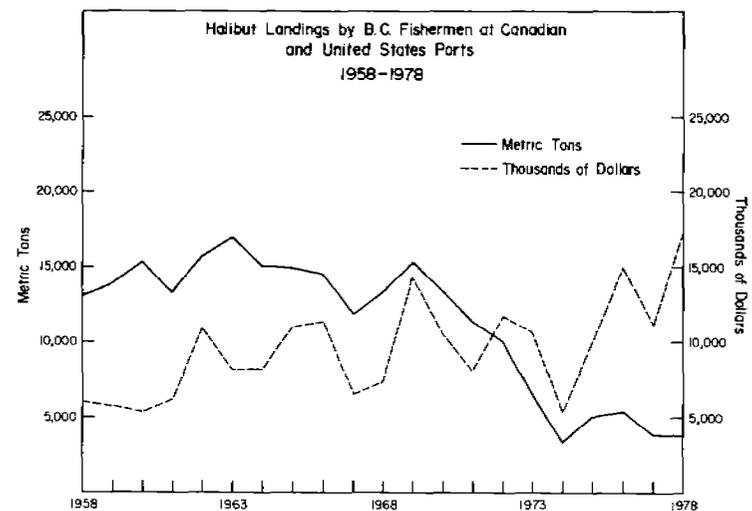

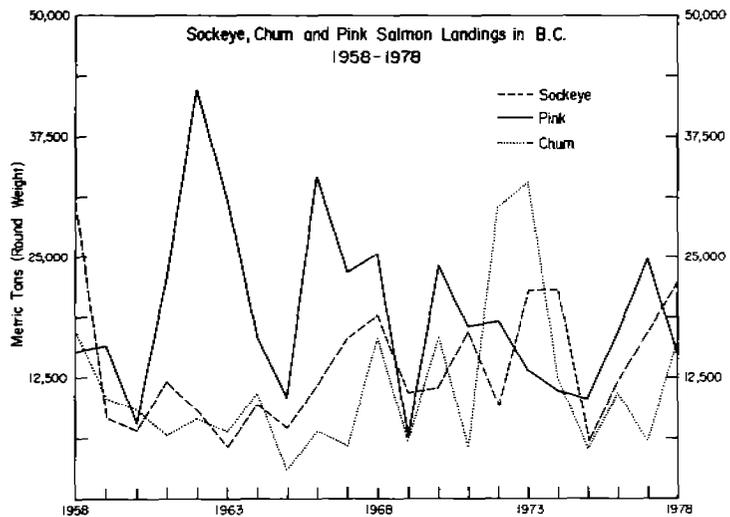

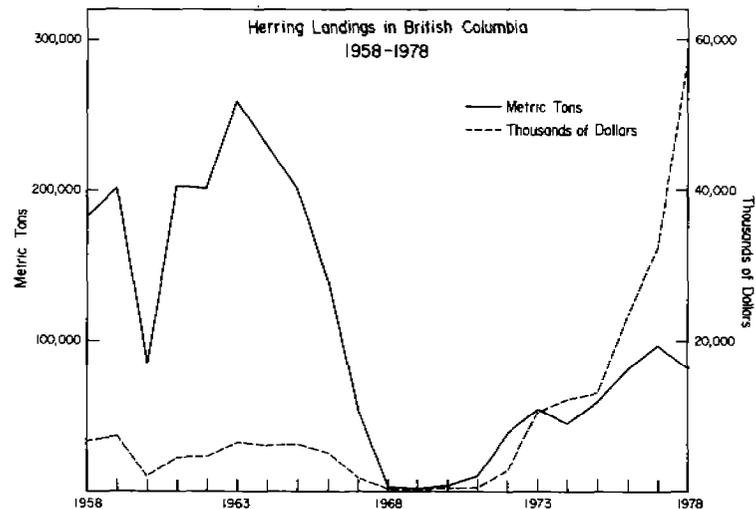

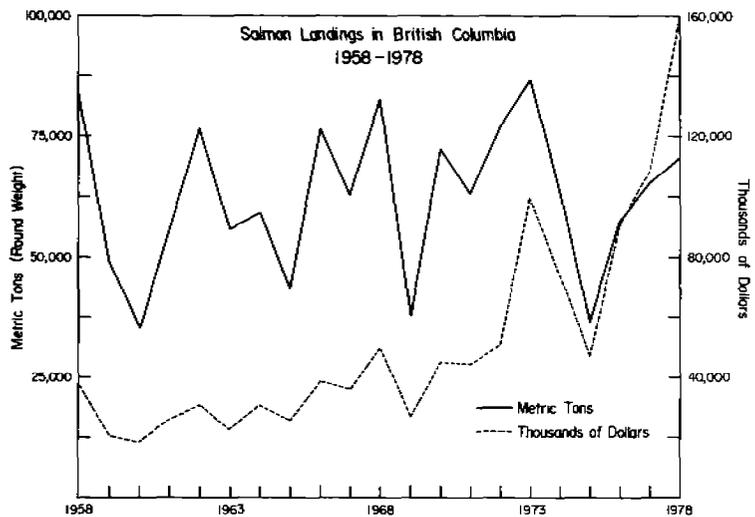

1 METRIC TON = 2,204.6 POUNDS

(2) A total of 1 570 metric tons of halibut valued at \$6,834,000 landed by B.C. fishermen at U.S. ports is included above.

(3) 76,815 U.S. shucked gallons converted to metric tons.

SUMMARY OF CATCH STATISTICS - BRITISH COLUMBIA - 1978

Landings by B.C. fishermen in 1978 of 193,269 metric tons attained a record value of \$252.2 million.

B.C. Landings and Value - 1969 - 1978

	<u>METRIC TONS</u>	<u>\$ MILLION</u>
1969	78 926	47.4
1970	108 184	60.3
1971	103 784	58.6
1972	153 090	75.1
1973	176 360	130.4
1974	135 082	101.0

1976	174 137	141.9
1977	198 042	167.9
1978	193 269	252.2

HALIBUT

Halibut landings of 3,864 metric tons were down slightly from last year but the value increased by 50 percent to \$16.8 million. The quantity landed at United States ports was up from the previous year at 1,570 metric tons valued at \$6.8 million.

HERRING

Although herring landings decreased from 97,172 metric tons in 1977 to 81,400 metric tons in 1978, the value reached a record high of \$56.8 million.

OTHER FISH

Landings of other species were 31,578 metric tons, an increase of 24% compared with 1977. Soles, ling cod, black cod and grey cod declined while rockfish, turbot, pollock and dogfish all showed significant gains.

<u>Year</u>	<u>Sole</u>	<u>Grey Cod</u>	<u>Ling</u>	<u>Rockfish</u>	<u>Total *</u>

* Total includes miscellaneous species not specifically shown.

SHELLFISH

Despite an increase in geoduck deliveries from 245 metric tons in 1977 to 1,018 metric tons in 1978, shellfish landings showed a slight decrease.

* Less than 500 Kgs.

SALMON

Salmon landings in 1978 of 70,604 metric tons (round weight) valued at \$158.2 million were up by 7.7 percent in quantity and 45.5 percent in value from the previous year. Sockeye exceeded all other species and totalled 22,321 metric tons accounting for 32 percent of all salmon landed. Chum landings climbed from 6,032 metric tons in 1977 to 15,855 metric tons in 1978.
