FOREWORD

Although this summary still follows the general format originally used in 1969, the figures are now shown in metric tons (1,000 kilograms). The summary will be followed by a detailed Annual Report to be made available on written request.

Preliminary monthly printouts are prepared throughout the year which summarize landings and values by species. This annual summary includes revisions of these data and represents final statistics for 1981.

Prior to 1973 net caught salmon was valued at the cash buying price or minimum prices negotiated by the United Fishermen and Allied Workers Union and the Fisheries Association of British Columbia. Since 1973 actual prices paid on the fishing grounds have been used because competition for salmon has resulted in higher than minimum negotiated prices being paid.

Weights shown may be dressed or round, and are indicated on table headings. Halibut landings include fish delivered by Canadian fishermen to U.S. ports.

Monthly periods do not coincide with calendar months, but are held constant as four or five weekly periods for historical comparison. Four week periods are March, May, June, August, September, and November; five weeks are April, July and October.

This report was compiled by the staff of the Statistics Collection and Processing Unit under the direction of Mrs. M. Kostner from summaries developed by the Data Processing Unit.

NOTES

With modern methods of icing and brining used by gillnetters and seiners and the increase in the number of troll freezer boats, "dates" in this publication refer to date of delivery, and not necessarily to date of catch.

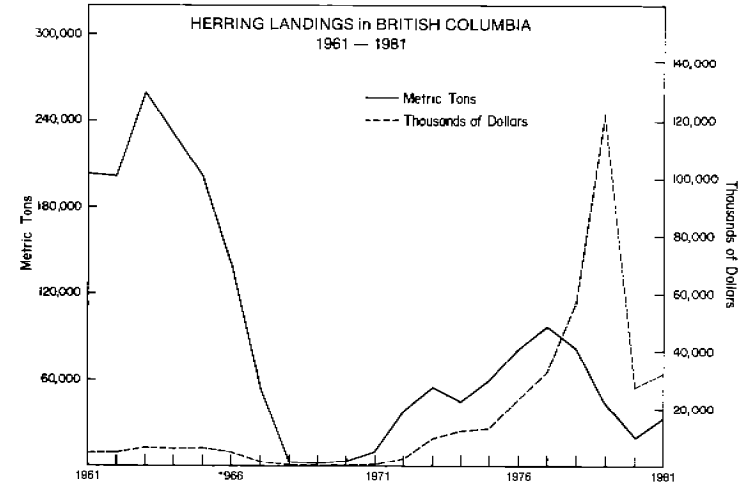

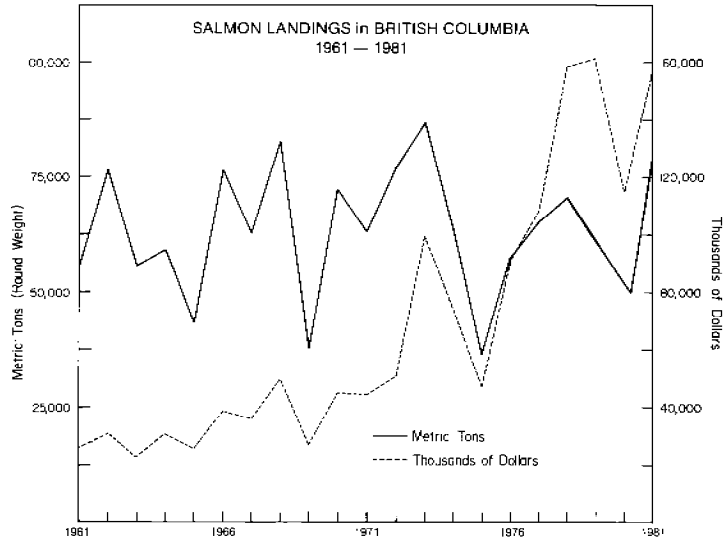

The conversion factor for metric tons is:

1 METRIC TON = 2,204.6 POUNDS

(1) See statistical map on page four.

(2) Landed weight does not necessarily correspond to round weight.

(3) A total of 223 metric tons of halibut valued at \$653,862 landed by B.C. fishermen at U.S. ports is not included in above.

(4) A total 44 metric tons of tuna valued at \$95,154 caught in American waters and 54 metric tons of tuna valued at \$149,116 caught in International waters.

(5) A total of 2,409 metric tons of oysters valued at \$1,437,486 not included in above.

(6) Hake Included

SUMMARY OF CATCH STATISTICS - BRITISH COLUMBIA - 1981

Landings by B.C. fishermen in 1981 increased by 18% from 1980, the landed value increased by 27% to \$231 million.

B.C. Landings and Value: 1972-1981

	METRIC TONS <i>caps?</i>	\$ MILLION <i>caps?</i>
1972	153 090	75.1
1973	176 360	130.4
1974	135 082	101.0
1975	126 645	79.7

HERRING

Herring landings increased from 25,155 metric tons in 1980 to 34,014 in 1981, an increase of 35%. The value increased from \$27 million in 1980 to \$35 million in 1981, an increase of 30%.

GROUND FISH

The most notable change is a 33% increase in the landings of sablefish (black cod) for 1981.

Quantity in Metric Tons.

1981	1 317	939	864 ⁽¹⁾	2 704	85	70 815

⁽¹⁾ Includes horse clams.

SALMON

Salmon landings increased by 47% and value by 35% or \$41.1 million in 1981. Sockeye and pink both showed remarkable gains.
