Salmon Catch by Species in Areas of Highest Catch	10-11	Deliveries and Days Fishing	23
Total Salmon Landings by Species and Gear (Percent)	12		

FOREWORD

Although this summary still follows the general format originally used in 1969, the figures are now shown in metric tons (1,000 kilograms). The summary will be followed by a detailed Annual Report to be made available on written request.

Prior to 1973 net caught salmon was valued at the cash buying price or minimum prices negotiated by the United Fishermen and Allied Workers Union and the Fisheries Association of British Columbia. Since 1973 actual prices paid on the fishing grounds have been used because competition for salmon has resulted in higher than minimum negotiated prices being paid.

Monthly periods do not coincide exactly with calendar months, but are held constant at either four or five weekly periods as follows:

- Four weeks - February, March, May, June, August, September, November, and December.
- Five weeks - January, April, July, October.

Under International agreement Canadians may land halibut at U.S. ports. Since 1964 these landings have been included in British Columbia Catch Statistics.

This report was compiled by the staff of the Statistics Division under the direction of Mrs. M. Kostner.

IMPORTANT NOTES

1. Weights shown in the tables are for the form most commonly used. To conform with departmental standards, the reported form has been changed for certain species, effective 1982. The details are as follows:
 - Lingcod is reported as Round weight. Previously, lingcod was always reported Dressed weight head-off. Multiply Round weight by 0.72 to convert to Dressed head-off.

- Sablefish (Black Cod) is reported as Round weight. Previously, Sablefish was reported Dressed weight head-off. Multiply Round weight by 0.70 to convert to Dressed head-off.
- Pacific Cod (Grey Cod) is reported as Round weight. Previously, Pacific Cod was reported Dressed weight head-on. Multiply Round weight by 0.80 to convert to Dressed head-on.

Reported form is unchanged for all other species:

- Halibut is reported Dressed weight head-off.
- Salmon - Trawl and Handline are reported Dressed weight Head-on
 - Seine and Gillnet are reported Round weight.
- All other fish are reported as Round weight.

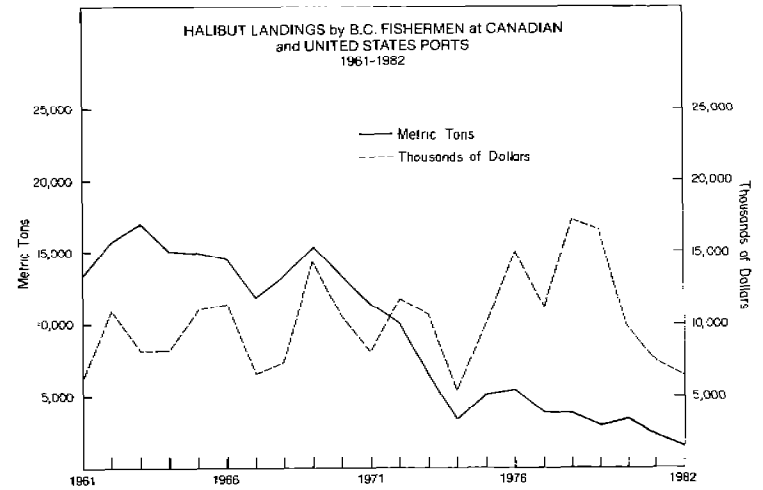

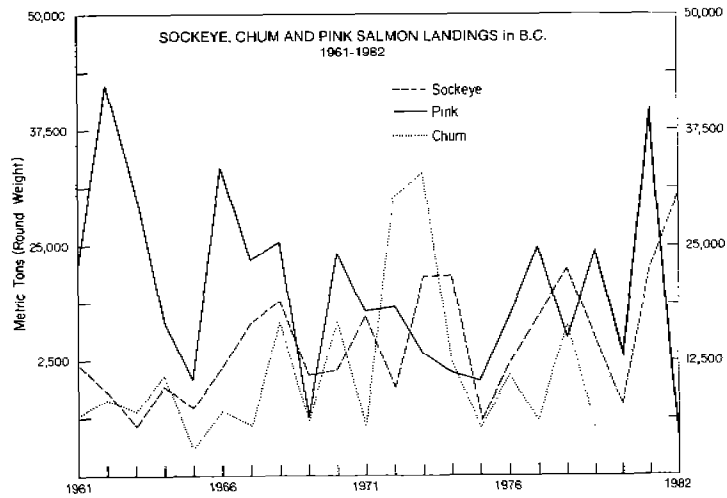

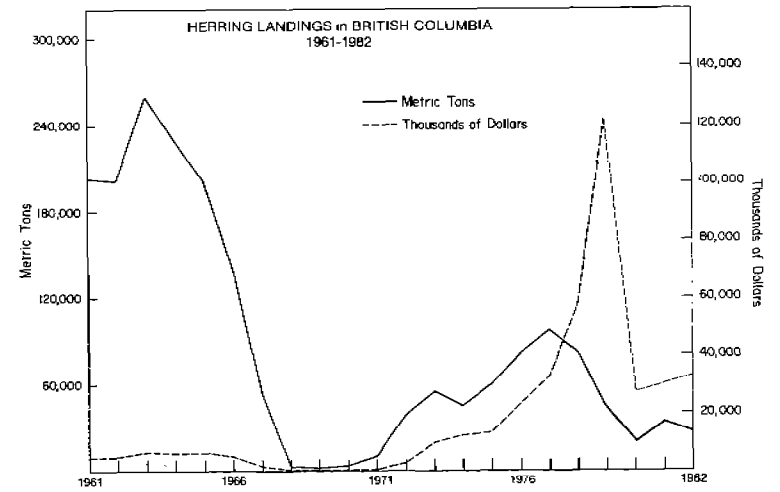

2. Deliveries and Days Fishing are detailed in a new section of the publication.
3. Taku and Stikine catches are now excluded from the North Coast Summary.
4. "Small" Chinook are net caught fish under 5 pounds round weight.
5. Due to rounding, rows and columns may not total exactly.
6. In this publication, dates refer to date of delivery. The date of delivery is not necessarily the date of catch for trolliers, gillnetters and seiners using modern fish storage methods.
7. The conversion factor for metric tons is:
1 METRIC TON = 2,204.6 POUNDS

(1) Lingcod, Pacific Cod & Sablefish now shown as round. See item 1 of Important Notes, page two.

(2) See statistical map on page four.

(3) An additional 692 metric tons of halibut valued at \$2,379,000 was landed by B.C. fishermen at U.S. ports.

(4) An additional total of 16 metric tons of tuna valued at \$36,934 caught in American waters and 48 metric tons of tuna valued at \$143,796 was caught in International waters. Log books indicated a further 28 metric tons of tuna not reported on sales slips.

(5) A total of 1579 metric tons of oysters valued at \$981,000 not included in above.

(6) Includes Domestic Hake landings. Excludes 19,616 metric tons of Hake valued at \$3,265,000 delivered over-the-side to foreign vessels in co-operative fishing arrangements. An additional 12,500 metric tons of Hake was caught by foreign vessels in Canadian waters.

(7) An additional 107 metric tons of crab was not reported on sales slips.

Landings by B.C. fishermen in 1982 decreased by 10% from 1981. However, the landed value increased by \$2.1 million.

B.C. Landings and Value: 1973-1982

	<u>METRIC TONS</u>	<u>\$ MILLION</u>
1973	176 360	130.4
1974	135 082	101.0

1981	147 127	231.1
1982	131 776	233.2

HALIBUT

There was a slight decrease in total landings in 1982. Landings at U.S. ports increased considerably.

HERRING

Herring landings decreased from 34,014 metric tons in 1981 to 28,598 in 1982, a decrease of 16%. The value decreased from 34 million in 1981 to 32 million in 1982, a decrease of 6%.

GROUND FISH

Landings of sole and Pacific Cod were lower again in 1982. Rockfish landings were up, Sablefish landings were down by 14%, and Lingcod landings were up significantly (59%).

⁽²⁾Includes horseclams.

⁽³⁾Includes 107 Metric tons not reported on sales slips.

SALMON

Chinook and Coho landed weights increased to 1979-80 levels. Sockeye landings were a 10-year high, while Pink landings were a 10-year low.
