FOREWORD

Although this summary still follows the general format originally used in 1969, the figures are now shown in metric tons (1,000 kilograms). The summary will be followed by a detailed Annual Report to be made available on written request.

Prior to 1973 net caught salmon was valued at the cash buying price or minimum prices negotiated by the United Fishermen and Allied Workers Union and the Fisheries Association of British Columbia. Since 1973 actual prices paid on the fishing grounds have been used because competition for salmon has resulted in higher than minimum negotiated prices being paid.

Monthly periods do not coincide exactly with calendar months, but are held constant at either four or five weekly periods as follows:

- Four weeks - February, March, May, June, August, September, November and December.
- Five weeks - January, April, July and October.

Under international agreement Canadians may land halibut at U.S. ports. Since 1964 these landings have been included in British Columbia Catch Statistics.

This report was compiled by the staff of the Statistics Division under the direction of Mrs. M. Kostner.

IMPORTANT NOTES

1. All figures in this publication are reported as follows:

- Lingcod is reported as Round weight. Multiply Round weight by 0.72 to convert to Dressed head-off.

- Sablefish (Black Cod) is reported as Round weight. Multiply Round weight by 0.70 to convert to Dressed head-off.
- Pacific Cod (Grey Cod) is reported as Round weight. Multiply Round weight by 0.80 to convert to Dressed head-on.
- Halibut is reported Dressed weight head-off.
- Salmon - Troll and Handline are reported Dressed weight Head-on
 - Seine and Gillnet are reported Round weight.
- All other fish are reported as Round weight.

2. Taku and Stikine catches are now excluded from the North Coast Summary.

3. "Small" Chinook are net caught fish under 5 pounds round weight.

4. Due to rounding, rows and columns may not total exactly.

5. In this publication, dates refer to date of delivery. The date of delivery is not necessarily the date of catch for trollers, gillnetters and seiners using modern fish storage methods.

6. The conversion factor for metric tons is:
1 METRIC TON = 2,204.6 POUNDS

(1) An additional 923 m.t. of halibut valued at \$2,197,382 was landed by B.C. fishermen at U.S. ports not included in above.

(2) A total of 18 m.t. of tuna valued at \$61,207 was caught in American waters and delivered to Canadian ports. Also, 29 m.t. valued at \$51,934 was caught in American waters and delivered to U.S. ports.

(3) A total of 2897 M.T. of oysters valued at \$2,109,329 not included in above.

(4) Includes domestic hake landings, excludes 28,906 m.t. of hake valued at \$4,652,735 delivered over-the-side to foreign vessels in co-operative fishing arrangements. An additional 13,190 m.t. of hake was caught by foreign vessels in Canadian waters.

(5) Based on information from production data and B.C. Export Statistics 1456 m.t. of dogfish valued at \$350,519 not included in above.

(6) Excludes 124 M.T. of prawns not reported on sales slips.

SUMMARY OF CATCH STATISTICS - BRITISH COLUMBIA - 1984

Landings by B.C. fishermen in 1984 decreased by 27 715 M.T. (18%) from 1983. However, the landed value increased by \$31.2 million (16%).

B.C. Landings and Value: 1975-1984

	<u>METRIC TONS</u>	<u>\$ MILLION</u>
1975	126 645	79.7
1976	174 137	141.9
1977	198 042	167.9
1978	193 269	252.2
1979	148 921	332.5
1980	124 455	182.3
1981	147 127	231.1
1982	131 776	233.2
1983	155 244	200.5
1984	131 479	232.7

HALIBUT

Landings in 1984 increased by 67%. Landings at U.S. ports increased by 73%.
