Track Your Catch

Name: _____

This form is provided to help you keep track of your fishing information during the month you are asked to participate in the Recreational Effort and Catch reporting program, so it is easier to fill out your report accurately on www.iRECreport.ca . See the bottom of your licence for your access iD. Using this form is NOT required and this form does not take the place of records you are required to keep on your licence regarding Chinook, Halibut and Lingcod catches .

The reporting program will ask for catch of any species listed in the BC Tidal Waters Sport Fishing guide. To ensure this record provides the information needed to complete your report, note the following and see the examples on page 2:

- ➲ Record all combinations of Date, Management Area and Fishing Method fished, even those with no catch.
- ➲ Record how many children with Juvenile fishing licences, for whom you are responsible fished with you and record their catch combined with yours.
