**FOREWORD**

This annual summary of British Columbia Catch Statistics follows the format originally used in 1969. It will be followed by a detailed Annual Report to be made available on written request.

Preliminary monthly reports are issued throughout the year which summarize landings and values by species. This Annual Summary includes revisions of these data and represents final statistics for 1974.

Because fish buyers do not report prices paid to fishermen for net caught salmon, minimum prices the fishermen's union and the fishing industry negotiated were used to value net caught salmon. Keen competition for salmon, however, encouraged buyers to offer prices in excess of the minimal negotiated prices. In 1973, for the first time, a new system of pricing more accurately representing actual prices paid to salmon net fishermen was devised. As a result, 1973 and 1974 salmon values are no longer comparable with those of previous years.

Weights shown may be dressed or round, and are indicated on table headings. Some totals may differ slightly due to rounding.

Monthly periods do not coincide with calendar months, but are held constant as four or five weekly periods for historical comparison. Four week periods are March, May, June, August, September and November; Five weeks January, April, July and October.

Halibut landings include fish delivered to U.S. ports by Canadian fishermen under international agreement.

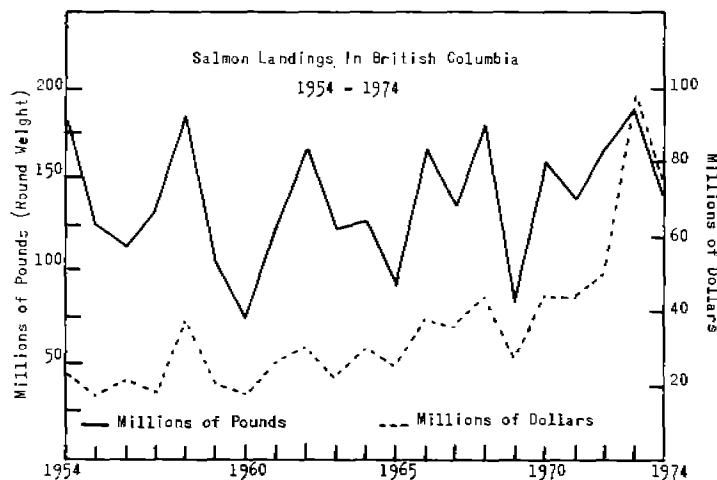

This report was compiled by the staff of the Market Intelligence Unit under the direction of Mr. J. D'Andrea and from summaries developed by the Data Processing Unit under the direction of Mr. H. Hsu.

Although landings of fish and shellfish during 1974 were 298 million pounds compared to 389 million pounds in 1973, fishermen's earnings of \$101 million were second only to the all time high of \$130 million earned in 1973. Each of the three major fisheries, salmon, herring, and halibut contributed to this decrease, but it was caused mainly by disappointing chum salmon returns and lower prices paid to fishermen because of buyer resistance due to unsettled economic conditions in foreign markets.

Salmon landings were 194 million pounds against 185 million pounds in 1973. Landed value of this catch was \$74 million, compared with \$100 million in the previous year. The principal reasons for the decline were a chum catch of 27.5 million pounds valued at \$10.7 million (44.6 million pounds and \$22 million less than in 1973), and lower prices paid to fishermen for all salmon species except sockeye. The 1965-74 average chum catch was 30 million pounds worth \$8 million.

Due to a continuing decline in Pacific halibut stocks since the mid sixties, 1974 halibut landings by the combined United States and Canadian fleet fell to 21.3 million pounds (85 per cent of the quota recommended by the International Pacific Halibut Commission), nearly 12 million pounds less than the combined 1973 catch. British Columbia fishermen accounted for 7.5 million pounds (35 per cent) of the total and received \$5.4 million - \$5.3 million less than in 1973.

Herring stocks continue to show encouraging signs of recovery since the fishery was closed for reduction purposes in 1968. The catch of food herring (49,239 tons) was 12,076 tons less than in 1973. This decrease was primarily the result of a lower roe herring quota in the Strait of Georgia and the inability within the industry to negotiate a price for food herring.

SUMMARY OF CATCH STATISTICS - BRITISH COLUMBIA - 1974

1974 landings by B.C. Fishermen at Canadian and U.S. ports reached a total of 298 million pounds, and were valued at \$101 million.

B.C. Landings and Value - 1965 - 1974

	<u>Millions of pounds</u>	<u>\$ Million</u>
1965	626.1	48.2
1966	574.7	61.5
1967	333.0	49.6
1968	268.8	57.4
1969	174.0	47.4
1970	238.5	60.3
1971	228.8	58.6
1972	337.5	75.1
1973	388.8	130.4
1974	297.8	101.0

HALIBUT

Halibut fishermen suffered a serious setback in 1974. Landings by British Columbia fishermen at Canadian and United States ports dropped to 7.5 million pounds. This was about 7 million pounds below 1973 landings and 18 million pounds below the 1965-74 average landing. The average price paid to fishermen was 79 cents compared with 74 cents per pound a year ago. The landed value fell to \$5.4 million from \$10.7 million in 1973.

Year	Landings in British Columbia		Canadian Landings at U.S. Ports, re- ported by Halibut Commission		Total Landings	
	Mill. of lb.	\$000's	Mill. of lb.	\$000's	Mill. of lb.	\$000's
1965	25.8	8 699	7.2	2 413	33.0	11 112
1966	24.5	8 687	7.5	2 784	32.0	11 471
1967	19.7	5 068	6.5	1 563	26.2	6 631
1968	22.5	5 620	6.9	1 720	29.4	7 348
1969	27.2	11 578	6.6	2 822	33.8	14 400
1970	20.0	7 242	9.5	3 946	29.5	10 588

1972	15.2	9 379	6.9	4 911	22.1	19 684
1973	9.9	7 348	4.6	3 350	14.5	10 698
1974	6.5	4 746	1.0	694	7.5	5 440

HERRING

The catch of herring for roe and food purposes was 98.5 million pounds worth \$12 million, 24.1 million pounds (20 per cent) less in volume but \$1.1 million (10 per cent) more in value, compared with 1973.

OTHER FISH

Landings of other species were 41.9 million pounds, compared with 50.7 million pounds a year ago. About 34.5 million pounds of groundfish - sole, red and rock cod, ling cod, grey cod, black cod, flounder, skate, ocean perch, turbot, and octopus - were landed, a gain of 1.5 million pounds compared with 1973. Landings of grey cod and ocean perch were up 2 million pounds and 1.4 million pounds, respectively; red and rock cod landings were off 1.7 million pounds from last year. Dogfish landings declined sharply from 11.6 million pounds in 1973 to 2.5 million pounds.

<u>Year</u>	<u>Sole</u>	<u>Grey Cod</u>	<u>Ling</u>	<u>Tuna</u>	<u>Total*</u>
	(000's lb.)				
1965	6 408	19 223	4 412	348	39 957

1974	7 179	15 592	3 884	2 675	41 861

\* Total includes miscellaneous species not specifically shown.

SHELLFISH

The production of shellfish during 1974 was mixed. 108,066 U.S. shucked gallons of oyster meat was about 23,583 gallons less than in 1973. Shrimp and clam deliveries increased 53 per cent and 55 per cent, respectively. 1974 crab landings dropped slightly from a year earlier.

<u>Year</u>	<u>Crabs</u> (000's lb.)	<u>Shrimp</u> (green weight)	<u>Clams</u>	<u>Shucked Oysters</u> (U.S. Gal.)
1965	3 501	1 755	2 097	150 676

1974	2 503	2 650	2 448	108 066

SALMON

PAGE 7

Landings of salmon in 1974 were down 28 per cent from 1973 and totalled 134 million pounds (140 round weight basis). The landed value of salmon was the second highest on record at \$74 million, about \$26 million below the 1973 record of \$100 million. Sockeye exceeded all other species and totalled 47 million pounds accounting for 35 per cent of all salmon landed. Chums were second in volume and totalled 27 million pounds. Landings by species were as follows: (on a round weight basis)

SPRINGS

	Quantity '000 lb. round	Pieces 1000	Average Size lb.	Landed Value \$1000
